Audit purpose	
<b>Audit objective</b>	The purpose of this audit is to validate participating company compliance with all ISSF conservation measures in place for the year of activity being audited.
<b>Audit criteria</b>	The PC compliance audits cover all conservation measures as defined in the ISSF Participating Company Compliance: Audit Policy Document and Standard Operating Procedures, Version 2022/3.
<b>Audit outcomes</b>	The auditing serves as an assessment of conformance by PCs. Any significant gaps in conformance and where corrective actions may be necessary will be specified. Timelines for remediation will be prescribed by MRAG in the audit report, however any sanctions or other actions will be at the discretion of ISSF. Depending on the nature of the non-conformance and the required corrective action, a follow up audit may be required.
<b>Purpose of this document</b>	All auditors will follow this checklist for conducting ISSF PC Compliance audits. The completed and approved copy of this checklist will serve as the audit report for each participating company.
<b>Other relevant documentation</b>	ISSF Participating Company Compliance: Audit Policy Document and Standard Operating Procedures, Version 2022/3.

Conformance with ISSF Commitments	
<b>Non-conformances</b>	Non-conformances must be raised against specific ISSF conservation measures. The severity of the non-conformance – and whether this jeopardizes the integrity of the ISSF program – determines which non-conformances are raised.
<b>Grading</b>	MRAG Americas defines audit findings as follows: <ul style="list-style-type: none"> <li>· Conformance (Ok) - the PC can provide evidence of compliance with a conservation measure</li> <li>· Observations - the PC is currently in compliance but there is a high risk that non-conformance could occur inadvertently without implementing preventative actions</li> <li>· Minor Non-conformance – the PC does not comply with a conservation measure, but this does not compromise the integrity of the ISSF initiatives</li> <li>· Major Non-conformance – the PC does not comply with a conservation measure, and this compromises the integrity of the ISSF initiatives</li> </ul>
<b>MRAG Americas' procedures</b>	MRAG Americas' procedures for handling non-conformances for PCs are as follows: <ul style="list-style-type: none"> <li>· MRAG Americas substantiates conformance through documented evidence.</li> <li>· Where a company cannot provide documented evidence of conformance with a conservation measure, a non-conformance must be issued.</li> </ul>

	<ul style="list-style-type: none"> <li>· All non-conformances must be graded either major or minor.</li> <li>· In the case of a non-conformance, ISSF may require a Corrective Action Response (CAR). The corrective actions must be in place and evidence of addressing the condition must be supplied to MRAG or ISSF within an agreed timescale or a follow up audit may be required.</li> </ul>
<b>Corrective Action Responses (CARs)</b>	To rectify non-conformances, the PC may be given the opportunity to provide a CAR. The nature of the CAR is at the discretion of the PC. MRAG Americas does not advise on what specific corrective action the PC may take but will assess whether the CAR is expected to address the non-conformance. MRAG Americas will also not provide advice with respect to any sanction that might be applied to a PC resulting from identified non-conformances. Such action will be at the discretion of the ISSF.

1.1	Tuna RFMO Authorized Vessel Record	<p>All purchases must be from vessels listed on the authorized vessel record of the RFMO governing the ocean area in which the tuna was caught, at the time of the fishing trip, so long as the vessel is of a size subject to listing in the RFMO authorized vessel record.</p> <p>For any purchases from non-PVR vessels, maintain a system to check and approve vessel listing. If company sources from vessels not registered with an RFMO, it must provide audit team with supporting evidence (such as National vessel registries, copies of vessel licenses, etc.) to demonstrate effectiveness of procurement screening system.</p>	All	<p>Auditor reviews company system to ensure that purchases are from properly listed vessels. If company sources from vessels not registered with an RFMO, auditor reviews additional evidence that vessel was exempt from RFMO listing and legally authorized to fish during the audit period.</p> <p>The traceability exercises, reviewing RFMO vessel records and checking ocean areas where vessels are fishing, verifies the system.</p>	Ok	<p>Company has a system in place to screen vessels ahead of procurement, to verify RFMO or national authority registrations.</p> <p>Vessels listed in the quarterly RFMO reports were either registered with an RFMO or their national authority. Company provided copies of fishing licenses as evidence for the latter.</p> <p>All selected vessels identified in the traceability exercise are properly listed in RFMO authorized vessel records.</p>	
1.2	RFMO Participation	All purchases must be from vessels flagged to a member or cooperating non-member (CNM) of the relevant RFMO or have applied with the RFMO for either status. If membership is not	All	Auditor reviews quarterly data sent by the company to the RFMO to check that all vessels meet this requirement. 4.3(a)	Observer Coverage	Evidence of 100% observer coverage (human or electronic) unless exempt or prevented by force majeure. The data collected by the observer must be made available to the flag state authorities and, if appropriate, to the RFMO, in the format required by the flag state (and RFMO). In case the flag state (or RFMO) does not accept the data, the vessel owner must store data for at least three years from the end of the trip. At a minimum, data to be made available are those fields required by the flag state for vessel logbooks.	Large Purse Seine	Auditor assesses company system for observer coverage of controlled vessels, company data submission to RFMOs and RFMO committee meetings and compliance reports, etc. If RFMO requires 100% observer coverage, no further evidence is required.
